PEAK

Performance Engineered Aftermarket Kits

we make the **earth** move.

Why PEAK?

Bucyrus' **PEAK** solutions have been created with customers in mind. Understanding the link between productivity and profitability, Bucyrus' engineering and technical service personnel have carefully selected the parts within each **PEAK** package to assist in the efficient and effective completion of maintenance and repair projects to limit machine downtime and maximize profitability.

As the original equipment manufacturer, Bucyrus is able to provide component parts that meet the exact fit, form and function requirements of the original machine specifications.

Value

PEAK packages strike the perfect balance of precision, quality and pricing. Manufactured to strict specifications, they install quickly and give you the confidence of getting the job done right the first time.

Quality

Genuine **PEAK** packages are created by the same team of engineers who developed your Bucyrus shovels, draglines and drills. **PEAK** packages are designed to meet the exact fit, form and function requirements of the original machine specifications, providing superior performance and productivity.

Convenience

By including all of the OEM recommended parts, **PEAK** packages promote the timely completion of your critical maintenance and repair projects.
